BIÇAKCILAR

MEDALLION

BI-MONTHLY NEWS BULLETIN - NOV/DEC 2019

OUR VISION

We believe in a world where everybody is taken care of, comfortable and happy, in sickness and in health.

CORPORATE MARKETING

OUR MISSION

Our compassion for healthy life is leading us to focus on innovative thinking and new technologies in order to provide medical devices that make living easier, more affordable and effective.

OUR WORLD

USE YOUR
imagination

**Bicakcilar 3rd Annual Partner Summit
April 21 - 24, 2020
Mark Your Calenders!**

We are delighted to announce our **Summit 2020** that will take place in April at a location that you can start imagining now!

To give you a clue, these are the world's bluest and calmest waters. The weather is beautiful, the air is as clean as it can get and the scenery can **open our minds to a lot of imagination**

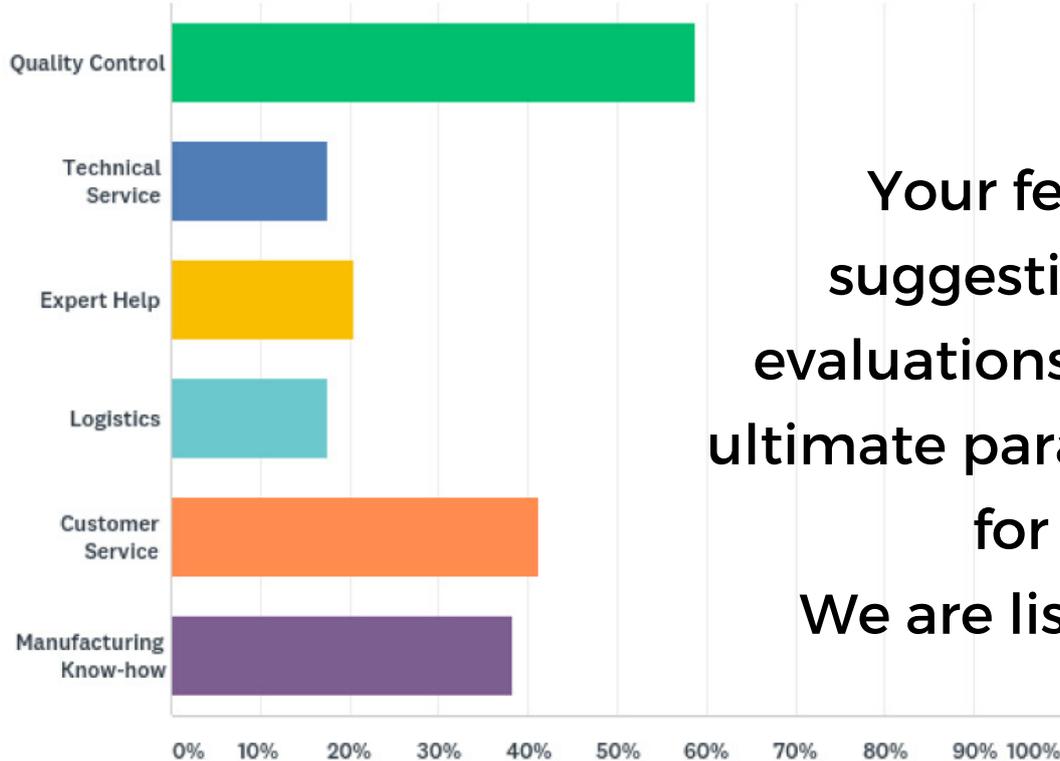

as we start 2020 in a very healthy environment.

We will send you more details, however, we kindly ask you to mark your calendars now.

If you can guess which city and country this scenery belongs to, we will present you with a local gift when you arrive at the Summit in April.

More details to follow soon....We are excited to hear from you....

THANKS A MILLION TO ALL OUR PARTNERS FOR RESPONDING TO OUR BRAND SURVEY!

Your feedback, suggestions and evaluations are the ultimate parameters for us and... We are listening...

One of the most important questions in the survey was about the value you see in doing business with us...

The following was your response to us...

The majority of the respondents indicated our value to be “quality control”. When it comes to saving lives, nothing can be more important than assuring that the quality control is done with the utmost attention to detail, perseverance and “zero tolerance” for errors. We always believed that this is what sets us apart from the crowd but now you confirmed it.

Thanks to all from the bottom of our heart!

In our laboratory, we work towards a world where people can live in an environment without pollutants to lead a healthy life that is possible only by keen focus on quality as we define a clean future for generations to come.

Focused solely on human health, our presence in this world is built on independent, unbiased, respectful, innovative, confidential and totally objective platform as we perform a wide variety of tests for a cleaner world.

Our zero tolerance for errors for quality is possible because of our focus on the fact that human life is priceless.

The values we work with are: impartiality, confidentiality, objectivity, freedom from conflict of interest, freedom from bias and prejudice, neutrality, fairness, open-mindedness and balance. Based on the brand survey responses we received, the awareness of our Lab was low and thus we are going to start providing you with more information as they expand internationally.

They are the foundation of our quality control system and the expertise and know-how are incredible values for this group.

FROM THE EDITOR

In weighing the pros and cons of buying and using disposable medical supplies or single-use medical devices over reusable medical devices, the number one factor is protecting patients. In this regard, single-use medical devices offer more protection than reusable medical devices.

Benefits of single-use medical devices—no risk of infection from the use of the product, immediate usage and increasing environmentally friendly solutions—are proving to be more cost-efficient, and offer time-savings that reusable devices cannot.

Though there is a place for reusable devices in medical practice and healthcare, the trend in using single-use medical devices and disposable medical supplies will continue to expand as newer, efficient technological breakthrough in manufacturing and production contribute to the production of higher quality instruments at lower costs.

At Bicakcilar, our medical disposables are under continuous scrutiny to assure our zero tolerance principle works with perfection.

Any disposable device that touches a patient's body goes through a quality control system that is like no other.
